Memo for the Record

It has become increasingly apparent that the [] Project will not produce a product responsive to our requirements unless we provide for closer and detailed liaison with them on our behalf. Additionally, it appears that [] has not been receiving the administrative support re security clearances, official information, etc. necessary for them to work at their optimum capacity in our behalf. Dr. Chadwell, ADSI, spoke with me some two weeks ago and suggested that we must provide for a more satisfactory liaison with []. He was then of the opinion that if we did not do so [] might attempt to withdraw from the relationship. Messrs. [] considered the matter on November 23rd and concluded that I should propose to Dr. Millikan that OFC should engage in a more direct relationship with [] as indicated in the basic memorandum. I talked with Millikan on November 28th and he was agreeable. He agreed, also, to notify []. I agreed that we would keep Millikan informed and would request no expansion of existing research or no new research without his prior knowledge and concurrence. This memorandum confirms my conversation with Millikan and requests him to make necessary notification to [].
